## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12, 34, and 36, drawn to signal switching in a processing system, classified in class 342, subclass 374.
  - II. Claims 13, 15-20, 27, 29-33, and 35, drawn to a variable true time delay system, classified in class 327, subclass 277.
  - III. Claims 21-23, drawn to calibrating a processing system using a reference signal, classified in class 342, subclass 174.
  - IV. Claims 24-26, drawn to calibrating a processing system using a combined signal, classified in class 342, subclass 174.

The inventions are distinct, each from the other because of the following reasons:

2. The inventions are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a time delay in any system that utilizes time delays. Invention III has separate utility such as calibrating a processing system without the use of combined signal calibration. Invention IV has separate utility such as calibrating a processing system without the use of reference signal calibration. See MPEP § 806.05(d).

Art Unit: 3662

3. Because these inventions are distinct for the reasons given above and the search required for the groups are different, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
